BOSTIK ON TRACK TO DELIVER ITS MID-TERM TARGET

Reach **14%** EBITDA margin in 2021

Three balanced drivers

- Grow high margin solutions
- Strengthen operational excellence
- Roll out acquisition strategy and implement synergies

COATING SOLUTIONS SEGMENT WELL POSITIONED TO ACHIEVE ITS TARGETS

OUR STRENGTHS

- A **unique value proposition** with a resilient, integrated global supply chain as a solid foundation
- An **optimal positioning**:
 - On higher growth market segments (e.g. construction coating, functional coating)
 - On high-growth technologies (e.g. rheology additives)
- A **wide portfolio** of **sustainable technologies**
- **Deep understanding** of **customers' needs**

OUR GROWTH INITIATIVES

Increase capacity in our existing platforms in **fast-growing geographies** (e.g. photocurable resins in China, powder coatings India,...)

Optimize **operating model** incl. closer integration with other platforms and downstream acrylics

Further strengthen our **sustainable technology** offering (low-VOC formulations, bio-sourced, energy efficient products)

OUTLOOK

- ▶ The positive market dynamics observed in the first quarter is continuing, supported by strong demand in the construction and DIY markets, and several industrial markets that are important for the Group
- ▶ Thanks to its innovation for sustainable development and recent industrial capacity expansions, while being attentive to the market environment, which remains volatile, Arkema considers it is very well positioned to benefit from the strongly rising demand for high-performance materials
- ▶ In this environment of robust demand, raw materials inflation should accelerate in the second quarter. The Group will continue its initiatives to increase prices to offset this impact
- ▶ In this context, and also in light of its first-quarter financial performance, the Group has raised significantly the Specialty Materials' guidance for 2021. Excluding a systemic resumption of the health crisis,
 - ▶ **Specialty Materials'** EBITDA is now expected to **grow by around 20% in 2021** compared to 2020 at constant scope and currency ¹
 - ▶ **Bostik**, in line with its 2024 trajectory, confirms its EBITDA margin **target of 14%** in the year, and **Intermediates'** EBITDA should **at least reach last year's level** at constant scope ² and currency ¹

1. With the assumption of a €/€ exchange rate of 1.2 for 2021, the impact on 2020 EBITDA is estimated at a negative €30m for Specialty Materials and a negative €10m for Intermediates

2. The combined EBITDA contribution of Functional Polyolefins, divested on 1 June 2020, and of PMMA, divested on 3 May 2021, was close to €135m in 2020 and €45m in 2021 (January – April, PMMA only)

DISCLAIMER

The information disclosed in this document may contain forward-looking statements with respect to the financial condition, results of operations, business and strategy of Arkema.

In the current context, where the Covid-19 epidemic persists across the world, and the evolution of the situation as well as the magnitude of its impacts on the global economy are highly uncertain, the retained assumptions and forward looking statements could ultimately prove inaccurate. Such statements are based on management's current views and assumptions that could ultimately prove inaccurate and are subject to material risk factors such as among others, changes in raw material prices, currency fluctuations, implementation pace of cost-reduction projects, developments in the Covid-19 situation, and changes in general economic and business conditions. These risk factors are further developed in the 2020 Universal Registration Document.

Arkema does not assume any liability to update such forward-looking statements whether as a result of any new information or any unexpected event or otherwise.

Further information on factors which could affect Arkema's financial results is provided in the documents filed with the French *Autorité des marchés financiers*.

Financial information since 2005 is extracted from the consolidated financial statements of Arkema. Quarterly financial information is not audited.

The business segment information is presented in accordance with Arkema's internal reporting system used by the management.

The main performance indicators used by the Group are defined in the 2020 Universal Registration Document. As part of the analysis of its results or to define its objectives, the Group uses in particular the following indicators:

EBITDA margin: corresponds to EBITDA as a percentage of sales, EBITDA equaling recurring operating income (REBIT) plus recurring depreciation and amortization of tangible and intangible assets

REBIT margin: corresponds to the recurring operating income (REBIT) as a percentage of sales

Free cash flow: corresponds to cash flow from operations and investments excluding the impact of portfolio management

EBITDA to cash conversion rate: corresponds to the free cash flow excluding exceptional capital expenditure divided by EBITDA
