

Transcend™ additive technology is the right remedy for your rigid foam formulation headaches

If you're tired of searching for the right additive for your foam formulations, try Arkema's Transcend™ additive technology. It's fast becoming the remedy of choice for formulators' wide range of headaches.

Formulating is easy with Transcend™ additive technology. It lowers viscosity and improves the processability of polyurethane foam formulations. This new technology also improves the performance of next-generation blowing agent replacements for 141b. Transcend™ additive technology can reduce costs and improve fire performance, including reduced smoke generation and flame spread.

Arkema is your source for Transcend™ additive technology, HCFCs, HFCs and custom blends. Learn more at www.transcendintothefuture.com or by calling **1-800-343-7940, ext. 7900**.
