# TERRABLEND™ GX CE

Dispersing agent for the ceramic industry

## **TYPICAL CHARACTERISTICS**

Polycarboxylate in aqueous solution Colourless to slightly yellow, clear liquid Appearance

Solid Content (%) 42 7.5 500 Brookfield viscosity (mPa.s) Specific gravity 1.315

## **DESCRIPTION**

Terrablend™ GX CE has been specifically designed to disperse Ceramic clays for tile and sanitary ware applications. Terrablend™ GX CE boosts the efficiency of sodium silicates dispersing agents for ceramic clays. Terrablend™ GX CE is to be used in blend with sodium silicates for tile manufacturing. Terrablend™ GX CE can be used alone for sanitary ware applications. Terrablend™ GX CE chemical nature makes it very stable in the hard processing conditions of ceramic clays grinding: resistance to high temperature, to high pH and to hydrolysis.

# **RECOMMENDED ADDITION LEVEL**

The recommended dosage of the blend sodium silicate / TERRABLEND™ range is from 95/05 to 65/35

# STANDARD PACKAGING

Other packaging may be available upon request

- 1000L IBC
- Bulk

## **HANDLING & STORAGE**

The product is not frost sensitive. Once opened, packaging should be resealed immediately after use. It should be protected from the effects of weathering, stored between 5 and 40°C and protected from sun exposure.

In these conditions, this product should be used within 12 months from delivery.

# **HEALTH AND ENVIRONMENTAL DATA**

For safe handling please refer to the Safety Data Sheet. For more information about health and environmental data, please contact us.

## **MARKET**

# **Building & Construction**

- Ceramics
  - Tiles

## **KEY BENEFITS**

- Functionality
- Typical use

Dispersing agent **Grinding aid** Glazing **Tiles**
