

# Rheosolve™ D, a full range dedicated to anti-scaling challenges

Anti-scaling & dispersing agents for domestic & industrial automatic laundry formulations, tablets, disinfectants

Characteristics						Applicative Performance		Key Features
Products	Description	Solids Content %	pH	Density	Appearance	Dispersing / sequestering efficiency	Crystal Growth Inhibition	
<b>Rheosolve™ D 5S</b>	Sodium polyacrylate Mw 5 000	45	8	1.33	Colorless to slightly yellowish liquid			Targeted markets: Laundry detergents & ADW Effective dispersing agents Prevent soil and mineral redeposition. Good chlorine compatibility Insure good anti-precipitating properties
<b>Rheosolve™ D 5AS</b>	Polyacrylic acid Mw 5 000	48	3.5	1.24	Colorless to slightly yellowish liquid			
<b>Rheosolve™ D 12AS</b>	Sulfonated copolymer	38	8	1.33	Pale yellow liquid			Targeted market: ADW Highly effective anti-filming & anti-spotting performance Improve shine and prevent soil redeposition Recommended for phosphate free formulations
<b>Rheosolve™ D 12ASG</b>	Sulfonated copolymer	> 92		0.5 to 0.6	White granules			
<b>Rheosolve™ D 15AS</b>	Acrylic copolymer	45	4.5	1.18	Clear to hazy, Colourless to pale yellow			Targeted market: ADW Best in class performance for anti-filming & anti-spotting Improve shine and prevent soil redeposition Designed for phosphate free formulations
<b>Rheosolve™ D 15ASG</b>	Acrylic copolymer	>92	--	0.45 to 0.65	White granules			

# Rheosolve™ T, a full range dedicated to thickening challenges

Liquid thickeners for scrubbing creams, liquid laundry formulations, all-purpose cleaners (hard surfaces, oven & grill cleaners, acid formulations...)

Characteristics						Applicative Performance		Key Features
Products	Description	Solids Content %	pH	Density	Appearance	Thickening efficiency	pH range	
<b>Rheosolve™ T 450</b>	Non ionic polyurethane	50	6.5	1.06	Whitish liquid		2 to 8	Targeted market: toilet care Designed for acidic formulations, hydrogen peroxyde and cationic containing formulations
<b>Rheosolve™ T 633</b>	Acrylic copolymer	30	4	1.06	White milky liquid of low viscosity		7 to 14	Specifically designed for very high pH
<b>Rheosolve™ T 635</b>	Acrylic copolymer	30	3	1.06			7 to 12	Good thickening efficiency, thixotropic effect Strong holding power on vertical surfaces
<b>Rheosolve™ T 637</b>	Acrylic copolymer	30	3	1.06			7 to 12	Very high thickening efficiency Combine high viscosity at rest with low viscosity under shear
<b>Rheosolve™ T 650</b>	Acrylic copolymer	30	2.5	1.06			7 to 12	Designed for high surfactant content formulations
<b>Rheosolve™ T 700S</b>	Acrylic copolymer	30	3	1.06			7 to 12	Targeted markets: Abrasive surface cleaner, liquid laundry & dish wash. Easy suspension for cleaning formulations
<b>Rheosolve™ T 701S</b>	Acrylic copolymer	30	3	1.06			7 to 12	Targeted market: I&I liquid hand wash Easy suspension for cleaning formulations INCI: acrylates copolymer
