PRODUCTION PLANT IN Geneseo

New York - USA

Geneseo, NY plant produces organic peroxides that are used primarily in the production of acrylics, elastomers, LDPE (low-density polyethylene), polyesters, polystyrene, and PVC (polyvinyl chloride). Many products that we encounter daily, from automobile components to food packaging, owe their existence to the chemicals produced at the site.

More commonly known by the tradename Luperox® organic peroxide, those made at the Geneseo site are used to cure boats, tubs, and spas. Others are used to allow plastics to be more easily processed for shaping and in the manufacturing of kitchen countertops. Our plant also produces peroxy-dicarbonates used to make PVC, which is then used to make many familiar products such as vinyl siding and plastic piping. The plant also produces a variety of benzoyl peroxides used in acne medication, whey powder processing, and polystyrene.

The Geneseo site has been operating in this community for more than 70 years.

COMMITMENT TO SAFETY & ENVIRONMENT

Ongoing conservation projects (including energy/water)

Scrap / plastic recycling

Responsible Care® member -- an industry-wide initiative among members of the American Chemistry Council - demonstrating a commitment to health, safety, and the environment

COMMUNITY INVOLVEMENT

- **Local Emergency Planning Committee (LEPC) -** A charter member and have conducted plant tours and safety training with members of the local fire department and Emergency Medical Service.
- **Arkema Science Teachers Program** – We provide a summer science workshop for local elementary science teachers, with materials and learning used more broadly across multiple grades.
- **Plant Tours** – We offer plant tours to students, interested neighbors and community leaders.
- **Livingston Chamber of Commerce**
- **Rochester Business Alliance**

KEY FIGURES 2024

85 employees

$~11 million in local impact **(includes payroll/utility/property taxes)**

$600,000 investment in health, environment, and safety

More than 3 years without a lost-time injury

AWARDS AND CERTIFICATIONS

- ISO 9001 CERTIFICATION
- ISO 45001 CERTIFICATION
- RCMS CERTIFICATION
- FSSC / ISO 22000 CERTIFICATION (FOOD SAFETY)

Building on its unique set of expertise in materials science, Arkema offers a portfolio of first-class technologies to address ever-growing demand for new and more sustainable materials. With the ambition to become a pure player in Specialty Materials, the Group is structured into 3 complementary, resilient and highly innovative segments dedicated to Specialty Materials - Adhesive Solutions, Advanced Materials, and Coating Solutions - accounting for some 92% of Group sales in 2024, and a well-positioned and competitive Intermediates segment. Arkema offers cutting-edge technological solutions to meet the challenges of, among other things, new energies, access to water, recycling, urbanization and mobility, and fosters a permanent dialogue with all its stakeholders. The Group reported sales of around € 9.5 billion in 2024, and operates in some 55 countries with 21,150 employees worldwide.
