

PRODUCTION PLANT IN NORTH KANSAS CITY

Missouri - USA

The North Kansas City, Missouri, plant produces a polyester resin used for powder coatings, which are part of finishes used on lawn furniture, toolboxes, light fixtures, parking meters, fences, railings, MDF, composites, automotive and ACE (Agricultural, Construction and Earthmoving) equipment – just to name a few.

The North Kansas City plant is the newest polyester powder coating resin manufacturing plant in the U.S. (built in 2002). Coatings made of Arkema polyester resins resist yellowing and have excellent outdoor durability. Product brands include **REAFREE®** Powder Coating Resins for interior and exterior systems, including, UV, and Ultra-low bake systems.

Certifications

- ISO 9001:2015 certification
- ISO 45001:2018 certification

Building on its unique set of expertise in materials science, Arkema offers a portfolio of first-class technologies to address ever-growing demand for new and sustainable materials. With the ambition to become in 2024 a pure player in Specialty Materials, the Group is structured into 3 complementary, resilient and highly innovative segments dedicated to Specialty Materials - Adhesive Solutions, Advanced Materials, and Coating Solutions - accounting for some 91% of Group sales in 2022, and a well-positioned and competitive Intermediates segment. Arkema offers cutting-edge technological solutions to meet the challenges of, among other things, new energies, access to water, recycling, urbanization and mobility, and fosters a permanent dialogue with all its stakeholders. The Group reported sales of around €11.5 billion (\$12.1 billion USD) in 2022, and operates in some 55 countries with 21,100 employees worldwide.
