

## NEW POLYAMIDE RHEOLOGICAL MODIFIER FOR HIGH TACK SYSTEMS

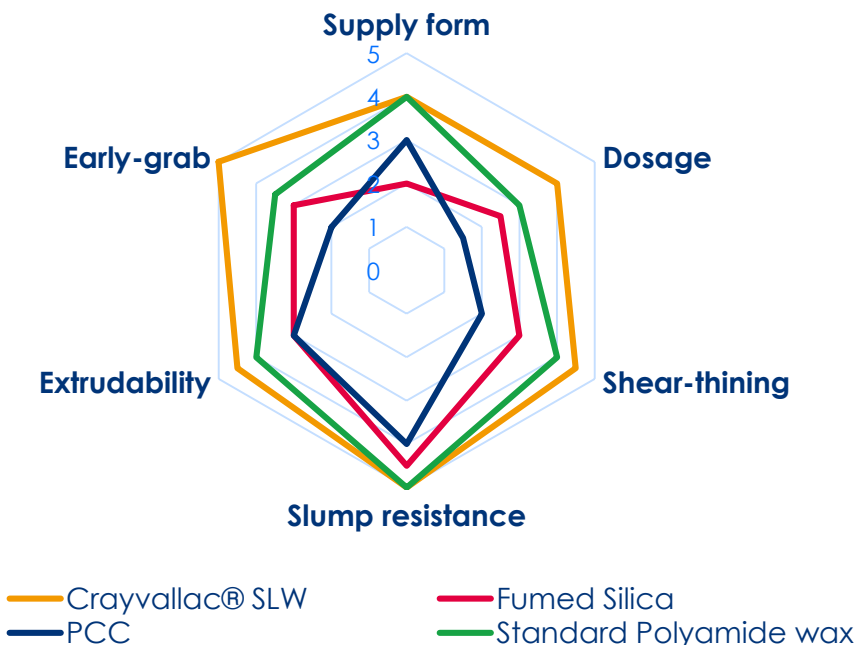

**Crayvallac® SLW is a high performance micronized amide wax rheology modifier especially designed for high tack, adhesives & sealants, combining the following key benefits :**

- ✦ Improved early grab
- ✦ Good workability
- ✦ High efficiency

**Crayvallac® SLW is mainly used in construction systems:**

- ✦ Chemical screws & bolts
- ✦ High tack systems
- ✦ Instant adhesives
- ✦ Material assembly

### Technology comparison

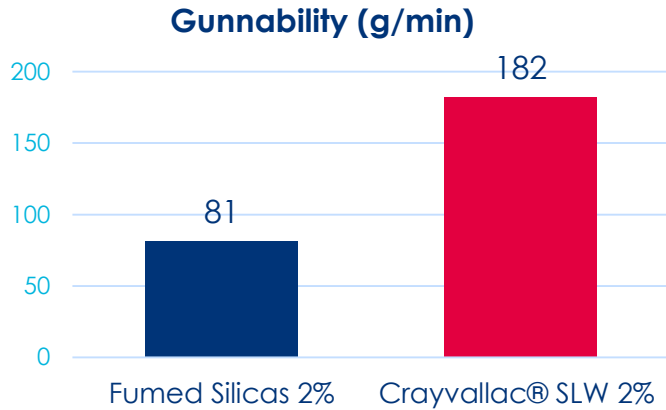

**Crayvallac® SLW** achieves perfect compromise between viscosity build and gunnability.

# Achieve unique adaptable performance

for your high tack systems

## Ease of application ...

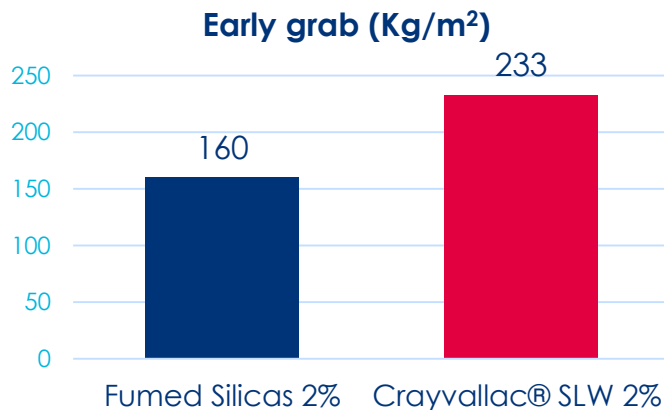

**Crayvallac® SLW** allows a **good gunnability** compared to Fumed Silicas

## ... Higher tack

**Higher green strength** properties compared to other market solutions

## Increased strength...

**Crayvallac® SLW** combines **ease of application** and **high strength**
