

Clearstrength® W-300

Acrylic Impact Modifier for Clear Applications

PRODUCT DESCRIPTION

Clearstrength® W-300 is a core-shell acrylic specialty copolymer designed to impart impact strength, weathering resistance and optical properties to vinyl formulations.

Combining the weathering resistance of acrylic impact modifiers (AIM) and the optical properties of methylmethacrylate-butadiene-styrene (MBS) impact modifiers, Clearstrength® W-300 impact modifier is the preferred choice for durable PVC products where clarity or colour rendering is important.

TYPICAL PHYSICAL PROPERTIES

Physical Form	White Powder
Specific Gravity	1.02
Bulk Density	0.39 g/cc
Particle Size	2% Max on 18 mesh
Percent Volatiles	1.0% Max

SUGGESTIONS FOR USE

Clearstrength® W-300 impact modifier is recommended for use in durable applications such as wood plastic or furniture film top layer, corrugated sheets for roofing and twinwalls, swimming pool covers, advertising signs, label holders and all transparent profiles and injection molded parts that need impact retention and long term UV resistance.

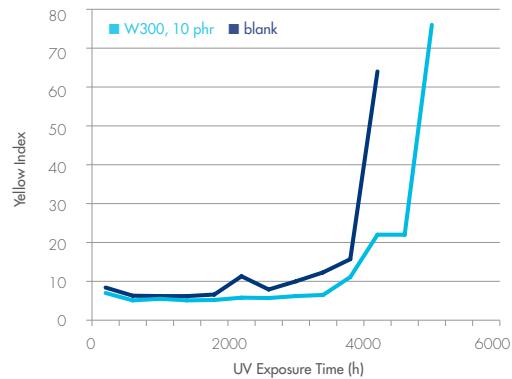

Recommended loading levels depend on impact requirement. Typical levels range from 8 to 15%. Prospective clients should evaluate Clearstrength® W-300 impact modifier in their own laboratories to establish optimum conditions for use in their process and applications. Arkema's Technical Service Team is available to discuss your application requirements, provide formulations guidance and laboratory testing as needed.

PACKAGING

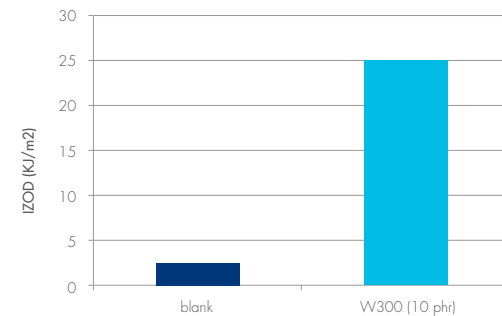

Clearstrength® W-300 impact modifier is packaged in 25 kg bags (625 kg per pallet) and 625 kg bulk bags (625 kg per pallet).

PRODUCT BENEFITS

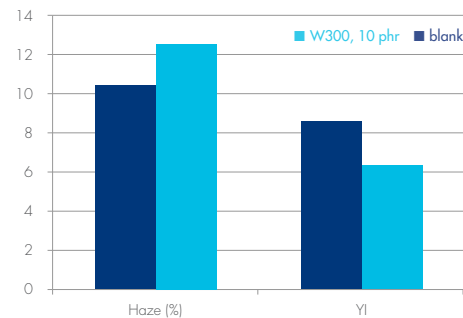

Weathering Resistance: Color Evolution through Xenotest

Impact Resistance: Izod impact, ISO 180, type 4A

Optical Properties

Formulation (phr): PVC Kw62: 100, tin maleate: 2.1, internal lubricant: 0.8, ESBO: 1, Plastistrength® 550 PA: 2, Plastistrength® L1000 PA: 0.15, oxidised PE wax: 0.15, UVA: 0.3

Purity

With unsurpassed purity over acrylic impact modifiers through unique coagulation process, Clearstrength® W-300 impact modifier is highly valuable in both clear and opaque applications, as it enables to create products with outstanding surface quality and color rendering.

ENVIRONMENTAL AND SAFETY INFORMATION

BEFORE HANDLING THIS MATERIAL, READ AND UNDERSTAND THE MSDS (MATERIAL SAFETY DATA SHEET) / SDS (SAFETY DATA SHEET) FOR ADDITIONAL INFORMATION ON SAFETY, HEALTH AND ENVIRONMENTAL INFORMATION.

The MSDS/SDS are available on our Website www.arkema.com or upon request at our Customer Service Department. Arkema believes strongly in Responsible Care® as a public commitment.

MORE TECHNICAL INFORMATION AVAILABLE

Ask your Arkema account manager for further information on high quality Arkema additives for use in PVC, PC, PBT, ABS, PLA and other polymer systems. Arkema produces a full line of impact modifiers, processing aids and epoxidized vegetable oils. In addition, Arkema's Technical Service staff is also available to assist compounders and processors with formulation and processing advice.

Durastrength® Impact Modifiers

Durastrength® acrylic impact modifiers deliver outstanding impact characteristics for outdoor durable applications in PVC and Engineering Resins.

Plastistrength® Process Aids

Plastistrength® process aids offer producers a complete line of melt strengtheners and metal release agents for PVC and Engineering Resins. Plastistrength® process aids can improve fusion, surging, and aesthetics.

Clearstrength® Impact Modifiers

Clearstrength® MBS impact modifiers are designed for extreme impact or impact/clarity combination in PVC and Engineering Resins.

Biostrength® Additives

The Biostrength® product line of impact modifiers, melt strengtheners and metal release agents are designed to improve properties and enhance processability of polylactic acid (PLA) and other biopolymers compounds.

Arkema has implemented a Medical Device Policy regarding the use of Arkema products in medical device applications that are in contact with the body or circulating bodily fluids: (<http://www.arkema.com/en/social-responsibility/responsible-product-management/medical-device-policy/index.html>). Arkema has designated Medical grades to be used for such medical device applications. Products that have not been designated as medical grades are not authorized by Arkema for use in medical device applications that are in contact with the body or circulating bodily fluids. In addition, Arkema strictly prohibits the use of any Arkema products in Medical Device applications that are implanted in the body or in contact with bodily fluids or tissues for greater than 30 days. The Arkema trademarks and the Arkema name shall not be used in conjunction with customers' medical devices, including without limitation, permanent or temporary implantable devices, and customers shall not represent to anyone else, that Arkema allows, endorses or permits the use of Arkema products in such medical devices. It is the sole responsibility of the manufacturer of the medical device to determine the suitability (including biocompatibility) of all raw materials, products and components, including any medical grade Arkema products, in order to ensure that the final end-use product is safe for its end use; performs or functions as intended; and complies with all applicable legal and regulatory requirements (FDA or other national drug agencies) It is the sole responsibility of the manufacturer of the medical device to conduct all necessary tests and inspections and to evaluate the medical device under actual end-use requirements and to adequately advise and warn purchasers, users, and/or learned intermediaries (such as physicians) of pertinent risks and fulfill any postmarket surveillance obligations. Any decision regarding the appropriateness of a particular Arkema material in a particular medical device should be based on the judgment of the manufacturer, seller, the competent authority, and the treating physician.
